INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/KR2004/002838

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

| Statement | | | |
|-------------------------------|--------|--------|-------------|
| Novelty (N) | Claims | 1 - 25 | <u>Y</u> ES |
| | Claims | None | NO |
| Inventive step (IS) | Claims | 1 - 25 | YES |
| • • • | Claims | None | NO |
| Industrial applicability (IA) | Claims | 1 - 25 | YES |
| | Claims | None | NO |

- 2. Citations and explanations (Rule 70.7)
 - 1. Reference is made to the following documents cited in the International Search Report:

D1: US 5,597,840 A D2: US 6,274,570 B1 D3: US 6,071,857 A D4: US 5,827,522 A

2. Novelty and Inventive Step

The present application claims a stable microemulsion composition comprising metalaxyl-M as an active ingredient, characterized in that the phase of the microemulsion is not destroyed by high concentration of Metalaxyl-M and the stability remains in a wide range of concentration even in the presence of water. The problem underlying the present application can be regarded as the provision of the metalaxyl-M microemulsion composition having less toxicity and longer stability, compared with the emulsion concentration composition using mixture of water-soluble and water-insoluble solvent or organic solvent only. The essential feature of the solution proposed by the present claims is the use of water and water-soluble solvent to dissolve the metalaxyl-M along with selected emulsifier(s).

See Supplemental Box for the next parts.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/KR2004/002838

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of:

٧.

D1 discloses the agrochemical microemulsion composition comprising an active ingredient such as Metalaxyl-M, a water-miscible solvent and an emulsifying agent. D1 does not teach the effect of emulsifying agents or aqueous solvent specified in the claims 1-25 in the presence of the active ingredient Metalaxyl-M for preparing the microemulsion composition. D2 and D3 describe the emulsion concentrated composition using a mixture of water-soluble and water-insoluble solvent to dissolve the active compound. It differs from the subject matter of claims 1-25 in that the water-insoluble solvent is applied to dissolve Metalaxyl-M. D4 relates to the preparation of microemulsion of active compounds consisting essentially of a solvating surfactant such as castor oil and rosin, which is not included in the subject matter of claims 1-25. Furthermore, Metalaxyl-M is not included as a preferred active ingredient in D4.

Thus, the subject matter of claims 1 to 25 is considered to be novel and involve an inventive step as set out in PCT Article 33(2) and 33(3).

3. Industrial Applicability

The subject matter of claims 1-25 meets the requirement for industrial applicability set out in PCT Article 33(4).
